

Wiha's automatic stripping pliers for wide variety of cables promise many advantages in terms of safety, efficiency and ergonomic design

The multi-talented Wiha pliers for easy cable preparation

Hand tool manufacturer Wiha offers a multi-functional tool for cable preparation with its automatic stripping pliers. They enable users to take a safer, more efficient, ergonomic approach to performing typical cable preparation tasks: stripping, skinning and cutting to length. Moreover, you can use these pliers for cable gauges between 0.03 and 16 mm², meaning you do not need to change tools so often while gaining other advantages in terms of flexibility and time savings.

The cutting function allows different cables to be easily trimmed to the desired length. With the metal blade insert, Wiha promises a long service life and robust design, resulting in cost savings for users since they will need to purchase fewer replacements. The adjustable longitudinal stop ensures precise handling. The spare blades and exchange aids contained in the handle are ready for use. An automatic closing function prevents cables in the cable assembly from being damaged accidentally.

Conceived based on ergonomic principles, these pliers are not only whisper-quiet in their operation but also protect user health thanks to another feature: the supplied damper can be inserted into the pliers to diminish recoil and protect the wrist while skinning large cable gauges of 6 mm² and above.

Once the handle is latched, these automatic stripping pliers are securely locked, thus saving space and making them ideal to carry around from job to job.

About Wiha

Wiha is one of the world's leading manufacturers of hand tools for professional use in trade and industry. Founded as a small family firm over 75 years ago, today, Wiha is a globally active company, still owner-operated by the Hahn family. Wiha seeks to make daily life much easier for users with a product assortment of innovative hand tool solutions geared towards user needs which increase efficiency, reduce costs and preserve health. This is why Wiha develops, designs and manufactures products that meet the strictest requirements for quality, functionality, durability and ergonomic design. It provides a comprehensive range of tool concepts and sets, screwdrivers, torque tools, multitools, L-keys, bits, pliers, soft-faced hammers and much more. Special professional VDE hand tool solutions ensure a greater, optimised range, based on the Wiha segment philosophy focused on need and demand. A host of design awards underline the setting of standards in terms of functionality, design and quality. In 2016, Wiha received the honoured distinction of being included among the top 100 most innovative companies among medium-sized enterprises in Germany. Wiha was also distinguished with the Manufacturing Excellence Award (MX Award) as the best SME in Germany back in 2014. A contemporary approach to HR management combined with a deeply rooted, open and fair corporate culture helped Wiha to gain Schwarzwald-Baar-Heuberg CCI's "Attractive Employer in Bronze" seal in 2016.
