

Remarkably well-organised - The colourful Wiha ErgoStar

The new Wiha L-keys in a nine-piece set unite several practical benefits in a single element thanks to the colour-coded product design and practical ball end shape. Storage in the ErgoStar holder also ensures simple handling and organisation for professionals in their daily work.

Users are highly familiar with all too common problems such as dropping, forgetting or losing L-keys while using them on equipment and machines. Wiha now offers the solution with safe storage and a highly visible, colourful appearance. Users can avoid unnecessary delays affecting the entire production process or worse: consequential damage to equipment and machines due to such oversights and mistakes. Thanks to the UV paint, L-keys are quick and easy to find even in the dark or in poor lighting conditions when users shine a suitable light, such as the Wiha torch, on them.

The innovative ball end also helps to increase efficiency, making it easier to access screws and allowing users to work at angles down to 25°.

There's yet another advantage in terms of handling and saving time: practical storage in the ErgoStar holder. It's also extremely easy to remove or insert L-keys in the holder. Users simply need to twist any L-key in the holder to activate a floating mechanism which turns all keys to the side at the same time and conveniently offers the required key. Suitable clamping makes sure keys cannot fall out regardless of whether the holder is open or closed.

Wiha thus adds true colour to your life and toolbox, not only saving users from hassles but also a great deal of time thanks to its high visibility and findability. www.wiha.com

About Wiha

Wiha is one of the leading manufacturers in the world for hand tools for professional use in trade and industry. Founded as a small family firm over 75 years ago, today, Wiha is a globally active company, still owner-operated by the Hahn family. We'd like to make daily life much easier for you with a product assortment of innovative hand tool solutions geared towards user needs which increase efficiency, reduce costs and preserve health. This is our priority. This is why Wiha develops, designs and manufactures products that meet the strictest requirements for quality, functionality, durability and ergonomic design. They provide a comprehensive range of tool concepts and sets, screwdrivers, torque tools, multitools, L-keys, bits, pliers, soft-faced hammers and much more. Special professional VDE hand tool solutions optimise and extend our range, based on the Wiha segment philosophy focused on need and demand. A host of design awards underline the setting of standards in terms of functionality, design and quality. In 2016, Wiha received the honoured distinction of being included among the top 100 most innovative companies among medium-sized enterprises in Germany. The company was also distinguished with the Manufacturing Excellence Award (MX Award) as the best SME in Germany back in 2014. A contemporary approach to HR management combined with a deeply rooted, open and fair corporate culture helped Wiha to gain Schwarzwald-Baar-Heuberg CCI's "Attractive Employer in Bronze" seal in 2016.
